COMNAVRESFOR INSTRUCTION 5314.1A

Subj: PEACETIME SUPPORT TRACKING SYSTEM (PTSTS)

Ref: (a) OPNAVINST 1500.41C

Encl: (1) PTSTS Codes

1. Purpose. To provide a computerized means of reporting contributory/contingency support. This instruction has been completely revised and should be read in its entirety.

2. Cancellation. COMNAVRESFORINST 5314.1

3. Background. Each year the Naval Reserve provides over a million mandays of contributory support to the Fleet. Commander, Naval Reserve Force (COMNAVRESFOR) is required by reference (a) to provide reports detailing this support. This information is critical in obtaining adequate funding for Annual Training (AT) and Active Duty for Training (ADT) and for assessing the effectiveness of our peacetime support program.

4. Action

a. The PTSTS code consists of a six-digit alphanumeric field listed in enclosure (1) of this instruction. It encodes the following information:

<u>Code</u>	<u>Definition</u>
First and second digits	Operations/Exercises supported
Third digit	Purpose of support
Fourth digit	Command supported
Fifth and sixth digits	Reserve Programs

b. All orderwriting activities must enter a valid PTSTS code on every AT/ADT order application. Code overrides or Not Applicable (N/As) entries are NOT authorized. Enter the appropriate code in the field entitled "TRACKING CODE" on the Reserve Field Management System application screen. Activities which use the Reserve Integrated Management System Order Writing Module, must enter the code in the "TRACKING CODE" field on the Incentive screen. In either system, if the six-digit code is not entered, or is entered incorrectly, an error message will appear when updating the screen.

c. Program Managers at Commander, Naval Surface Reserve Force and Commander, Naval Air Reserve Force will verify the code from the field and make any obvious corrections.

d. When Reservists perform AT/ADT at a location other than the reporting site stated on the orders (reporting to one site then performing AT/ADT at another site), fill in the "Further Assignment Information" on the Additional Assignment screen in the Reserve Integrated Management System Order Writing Module. In both cases, the correct unit identification code and reporting dates to additional sites must be used. Correct use of this Further

23 MAY 2000

Assignment Data is vital in capturing the complete peacetime support data. COMNAVRESFOR (N31) will update enclosure (1) of this instruction as PTSTS codes change.

e. Commands that request Reserve support to fill exercise billets will include the appropriate PTSTS code in the text of the exercise message.

B. D. WOOLNOUGH
Chief of Staff
